HOW TO READ YOUR HOROSCOPE

Sun Sign - SOUL EVOLUTION: When you read your horoscope for your Sun Sign, you will be illuminating your main focus for the month and the lessons you are meant to be learning on a soul level whether these are areas you are wanting to focus on or not.

Moon Sign - EMOTIONAL NECESSITIES: Your Moon Sign horoscope explains your current need for improved security and fulfillment so that you can feel more comfortable, stable, and supported to do your best work.

Rising Sign - HUMAN FOCUS: When you read your horoscope for your Rising Sign, this is usually the one that rings the most true. That is because it is what we are consciously focused on achieving and working on. We may think it's our idea to "update our appearance this month" or "get organized in the office", but even this is based on the cosmos and which of our houses the planets are in!

Why you need to be careful with Rising Sign Horoscopes:

Because they are based on the incredibly unique placements of our own house system, the signs may be off by one house when you are reading a general horoscope column for your Rising Sign. Knowledge of the houses will help you differentiate which sign is most accurate for you to read.
